## Celebrating 10 Years in the Business

April 24, 2014

Greetings! We wish to introduce you to A-Amp Electric Corp. Our Company specializes in providing what we believe to be the finest installations of electrical and lighting systems in residential and commercial properties. A-Amp Electric Corp. has been in business since 1994 and we have been very successful and are growing every day.

We are fully licensed and insured Electrical Contractors with licenses in Westchester and Putnam Counties of New York, as well as the State of Connecticut. Among our many services are installations according to customer design/desire, including new electrical service installations and upgrades from 200-amps and beyond. We install and connect Lutron™ home lighting systems, cable TV, as well as data/phone line installations and digital phone/intercom systems. We also supply and install emergency standby generators up to 100Kilowatts

The entire staff prides themselves in the quality of work they do and strive every day to raise the standard but, most of all we take great pride in our customer service. One of the biggest complaints customers have of other companies is speaking to a voice mail system or answering machine. Moises staffs our office from 8 AM on to answer the phones with a smile and satisfy our customers. In the event we are not in the office an emergency number is provided so that we can always be reached. Our customers are our first priority and we understand your project is very important and time sensitive. Our entire staff makes every effort to accommodate all of our customers, regardless of project size.

Enclosed is a small introduction of A-Amp Electric Corp. and it's staff, along with a few photos of two past projects. It is our hope that this helps you understand our company but if there is anything else you need to know please feel free to call and ask us any question. You can reach Moises in the office beginning at 8 in the morning.

Our staff is proud to be able to present this to you and your company in the hopes of beginning a long and fruitful working relationship, one where we make YOU and your project important.

The Management and Staff of A-Amp Electric Corp.

## Celebrating 10 Years in the Business

### Our Mission

To provide quality installations of electrical systems and lighting for residential homes and commercial businesses in a timely manner while maintaining value and customer service as priorities

### President

Frank Caltabellotta

Frank began as an electrical helper many years ago and even as a worker always insisted that customer satisfaction was a key to success. As a helper Frank focused on learning everything about electrical work while maintaining a dream of having his own business.

Frank continued to work for an electrical contractor while beginning his own customer base along with his friend Fred Lore until 1994 when they realized their dream of beginning a new company. It was then they formed A-Amp Electric Corp.

Frank's specialty is his ability for creating a system for efficiency. It is very important to Frank that all workers have an environment of quality but speedy labor and his first priority is always a happy customer.

### Vice President

Fred Lore Jr.

Fred began his career as an apprentice with local union #3 of the International Brotherhood of Electrical Workers. It was there that Fred acquired much of his knowledge of the electrical business.

Fred worked for the union for several years while still doing side work alongside Frank until 1994 when they birthed A-Amp Electric Corp.

Fred's specialty is his understanding of large and commercial electrical systems.

## Office Manager

Moises Garcia

Moises has extensive experience in customer service as well as manufacturing and Human Resources. He is the backbone of the office taking phone calls, typing up estimates and handling our invoicing.

Moises' specialty is customer service and he always strives to please the customer even providing his personal mobile number to customers so that there is someone to reach when the need is there.

## Douglas Mooney

Project Supervisor

Douglas has worked with A-Amp for four years and he has experience in all aspects of electrical work. Doug is especially important, handling service calls and emergency situations.

Doug also prides himself in maintaining great customer satisfaction and goes beyond the call of duty to make sure our customers are happy and get their money's worth.
